**DETAILED ACTION*****Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 11-22, drawn to a switching circuit for generating electromagnetic waves.

Group II, claim(s) 23, drawn to an electromagnetic source with a membrane.

Group III, claim(s) 24, drawn to a lithotripter with an electromagnetic source, an acoustic lens and a cushion adapted for placement against a subject to be treated with focused waves.

The inventions listed as Groups I, II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I and II lack a single inventive concept because while Group I is directed to a switching circuit, Group II is directed to an electromagnetic source with the additional feature of a membrane included in the electromagnetic source. Groups I and III lack a single inventive concept because while Group I is directed to a switching circuit, Group III is directed to a lithotripter with an electromagnetic source, with the additional features of an acoustic lens and a cushion adapted for placement against a subject to be treated with focused waves. Groups II and III lack a single inventive concept because the membrane in Group II and the acoustic lens and cushion of Group III are mutually exclusive and prevent them from being a single general inventive concept. The generic inventive concept included in Groups I, II and III is exemplified as generic in Eizenhoefer, DE19814331-A1 as taught in the Abstract; therefore, the feature is not novel.

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
